Estimate Request Guidelines

If you are interested in having us provide you with an estimate for an upcoming project we will require the following information, which can be submitted via mail or in person at our office or via email to maggied@jmpereira.com

| | |
|---|---|
| Excavation and Concrete/ Block Foundation Work | Please send us: Your contact info, company name and address Project name and location Project plot plan Foundation Plan Elevation Plans Structural Details Additional sheets showing any options not included on the foundation plan What parts of the project you would like us to quote. |
| Waterproofing | When waterproofing is to be quoted in conjunction with concrete work, we will price it as per plans based on an estimated average spray height. When waterproofing is quoted independently of concrete work it is quoted as a unit price and billed as per field measure so that any variation from the plan is reflected in your final price. |
| Floor Underlayment | Please provide the following information: Your contact info, company name and address Project name and location Floor plans showing all areas to receive underlayment UL floor assembly detail or UL number. What type of finish flooring will be installed. What your sound and fire rating requirements are for this project. |
| Equipment Rental | Our equipment rental pricing may vary in the event you are planning a significantly large or involved stone or concrete placement project. Please feel free to contact us to discuss pricing if this is the case or to request a faxed pricing sheet. |

In most instances our turn around time for concrete, excavation and waterproofing quotes is approximately 2 weeks. Thanks for considering us for your next project! We are looking forward to working with you!
